

Eugene Shteyn
Director,
Inflexion Point Strategy, LLC
Eugene@ip-strategy.com

Eugene Shteyn advises technology companies on implementing structured invention creation processes and innovation development strategies. Eugene has also designed and taught four different courses on model-based invention and innovation at Stanford University. He applies his ground-breaking methods across a broad range of technology domains and has facilitated corporate invention development programs that have resulted in the filing of hundreds of patent applications relating to nanotechnology, digital media, internet services, software architecture, security, high-performance networking, gaming and medical devices. He is a named inventor on 28 U.S. patents and more than 50 pending patent applications. He has guided and motivated high-impact interdisciplinary teams, and has established standards alliances among major global companies. Much of his work is embodied in current products and industry standards. He was a Director of Intellectual Property Licensing at Hewlett Packard and a Principal Scientist at Philips Research in Silicon Valley. He is currently a visiting scholar at the Laboratory for Nanostructured Energy Conversion Devices (LNECD) at the University of Michigan, Ann Arbor. He holds degrees in mechanical engineering and computer science.
